RAYFace

One-shot 3D Face Scanner

The field of dentistry

3D scanning technology helps you realize your clinical ideas multifacetedly. One can utilize it for orthodontics, implants, aesthetic, and complex prosthetic treatments.

Orthodontics

Implant

Prosthesis

Just like taking a photograph,
Easy one-shot scanning.

RAYFace shoots simultaneously within 0.5 seconds from multiple angles. RAYFace is an innovative scanner that reconstructs your natural smile into high-quality 3D data. Obtain more precise and vivid 3D data with the RAYFace scanner to present a solution that better fits the smile design.
